## Summary

work culture.

Dynamic and self-motivated software engineering fresher with brilliant interpersonal and communication skills. Proven ability to work in teams and individually to deliver quality outcomes. Committed to learning and exploring real-world applications in software engineering. Seeking internship opportunities to gain experience in the field.

## Experience

**Data Visualization • TATA**

**May 2023 - Present**

Completed virtual internship with Tata Company associated with Forges to create data visualisations, utilising technical skills to provide successful results. Participated in college level coding competitions, leveraging analytical and problem-solving skills to develop innovative solutions. Provided expertise and support to teams, offering guidance and direction to ensure successful outcomes. Managed multiple projects simultaneously, executing complex activities to achieve project goals and milestones. Developed creative strategies to improve data visualisation processes, resulting in increased efficiency. Collaborated with stakeholders to identify areas of improvement, implementing new initiatives to enhance customer experience. Enhanced knowledge of coding languages, expanding technical capabilities to create more efficient solutions.

## Education

**Bachelor of Engineering - BE • Global Academy of Technology**

**Dec 2020 - Present**

Computer Science And Engineering • Grade: 8.0

I am an high-achieving student with an impressive academic background. I have graduated from SSLC with 88.8%, showing my proficiency in all areas and a dedication to success. My PUC result was a remarkable 89.4%, highlighting my commitment to education and my dedication to learning. I am an enthusiastic learner, eager to gain new skills and knowledge. I am hard-working individual, passionate about my studies and achieving my goals. I am also good in Communication skills

## Projects

**Courier Management Application, IPL Win Prediction, Employee Management System**

**Jul 2022 - Present**

Global Academy of Technology

## Achievements and Awards

### Academic Hackathons

Jun 2023

Global Academy of Technology

---

## Skills

Data Base Management System, Java Basics, Data visualization,  
Data Structures and Algorithms in c, Data Science Basics, HTML, CSS AND Javascript,  
Python basics
